Mini Air Purifier

User Manual

Ver: 1.02

Certified by:

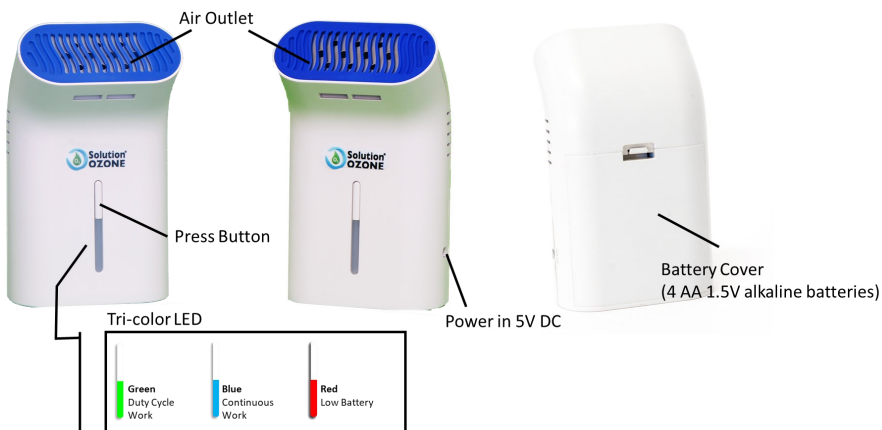

Function

- 1 - *Remote stale smells and odors* - Mini Air Purifier generates ozone, which is a powerful oxidizing agent, it will have oxidizing reaction to harmful toxic ingredients and organic odors in the air, removing bad smells and relieving toxicity without any secondary pollution.
- 2 - *Strengthen body immune system* - Mini Air Purifier generates anions which help to improve the pulmonary function and myocardial function, also improve sleep, promote the metabolism and enhance the ability of resistance.
- 3 - *Remove dust & pollen and kill bacteria & germs* - Anion charged particles neutralize the positively charged particles floating in the air, it is able to eliminate dust, smoke and pollen particles, which carry allergies. Ozone is a powerful oxidizing agent; it can kill various bacteria & germs in the air.
- 4 - *Prolong food freshness time* - Due to ozone's peculiarity of killing various bacteria & germs from food, with the Mini Air Purifier that generates ozone, it prolongs food freshness time. Parallel to this, as well as eliminating the pesticides on the fruit and vegetables skins.

Rated voltage	12 V DC	Ozone concentration	< 0.05 ppm (50 cm distance) > 1.5 ppm (continuous work/1hour/32L)
Power	<0.2W	Negative ion output	> 2 x 10 ⁶ pcs /cm ³ (10 cm distance)
N.W.	126g	Material	ABS Plastic
Dimension	122 x 73 x 51 mm	Operating Temperature Range	126g

Product specifications

Operating Instruction

1 - AA Batteries Operating

1.1 - Remove the battery cover on the back of Mini Air Purifier, install 4 “AA” 1.5V high-quality alkaline batteries (not included).

1.2 - Press the button, the unit runs with an automatic cycle of 2 minutes ON / 10 minutes OFF. During the ON period LED emits a continuous green color and during the OFF period it blinks with green color.

1.3 - If you press the button once again, the unit will restart and run with the cycle of 2 minutes ON and 10 minutes OFF.

1.4 - To turn off the Mini Air Purifier press for 3 seconds. LED will blink twice with red color which means that the unit is switched off.

1.5 - If LED emits (during the 2 minutes ON period) or blinks (during the 10 minutes OFF period) with red color, it means the batteries are low and need to be changed, the unit still works under such condition, but not as well as with new batteries.

2 - USB Cable Operating

2.1 - Connect the adapter to the unit with USB cable, then plug the adapter into the mains socket 100-240V AC, 50/60Hz.

2.2 - Press the button, the Mini Air Purifier will work continuous automatically (mode 1) and LED emits a continuous blue color.

2.3 - Press the button once again, the Mini Air Purifier runs into an automatic cycle 2 minutes ON / 10 minutes OFF (mode 2). During the ON period LED emits a continuous green color and during the OFF period it blinks with green color.

2.4 - If you press the button once again, the Mini Air Purifier goes into mode 1 again and then press the button again, it goes into mode 2. Use the button to change from mode 1 to mode 2 or back again.

2.5 - To turn off the Mini Air Purifier press for 3 seconds. LED will blink twice with red color which means that the unit is switched off.

3 - Attention:

3.1 - When you change from external power to internal battery operation, you need to restart the Mini Air Purifier by pressing the button. Or the reverse.

3.2 - As soon as plugging-in adapter, external power supply way is priority over battery way.

3.3 - If you press the button for 10 seconds, the unit will go into testing mode with an automatic cycle of 5 seconds ON, 6 seconds OFF. In this case, please, switch off the unit and switch it on again. The unit will go into normal mode.

3.4 - The battery operating mode only works when the power cable is removed from the unit.
